**Educational Background:-** MCA, B.Tech / M.Tech. or any equivalent Engineering degree in Computer Science equivalent or formal qualification in Computer science and Technology.

**Professional Experience:** - Having total minimum 5-7 years of experience in software development. Relevant Experience on similar position minimum 3-4 years. Technically sound programmer who can lead the team to deliver technology solutions and services.

### **Desired Skill Sets:-**

- Advance proficiency in MEAN Stack(FULL) technologies like Angular JS, Mongo DB, Node JS, Enterprise JS etc., Stack & E-commerce CMS, JS frameworks, open-source platform and database designs.
- Confident and Capable to take a Technical decision and convince management team by the Cost-Benefit Analysis on Technology Investments to back his/her decisions.
- Experience developing web applications (Spring MVC, RESTful, JAX-WS) and SOAP web Services.
- Well conversant of Microsoft technologies ASP.Net & SharePoint.
- Well conversant of OOPS Concept armed with latest JAVA technologies platform JavaFX & Java EE - MVC.
- Worked on Cloud computing frameworks for developing SAAS (Software-As-A-Services) enterprise application deployed on AWS (Amazon Web Services) Microsoft Azure, Google Cloud.
- Experience in leading a development team following SCRUM/Agile methodology.
- Solid understanding of web technologies such as REST, HTTP, JSON.
- Familiar with development tools such as cross-compilation, source revision control(GIT),
- Well conversant of implementing Bug tracking (JIRA), and JTAG debuggers.
- Ability to learn new technologies quickly. Become Coach to guide other team members at short notice.

- Demonstrated deployments of the enterprise or consumer-facing mobile software systems using industry standard environments including iOS, Android, Xamarin. Well Conversant Design aspects on Cross platform for mobile application development.
- Well Conversant of UI Interface (HTML5, Bootstrap, JQuery, Slim, JavaScript).
- Identify the appropriate software architecture based on the requirements and design elements contained in a system specification (Enterprise Architecture, Enterprise Application Integration and Application Architecture).
- Experience in deploying tools to improve code quality, continuous integration and performance measurement.
- Demonstrated deployments of the enterprise or consumer-facing mobile software systems using industry standard environments including iOS, Android, PhoneGap.
- A thorough understanding of OOPS, design patterns, iOS, Android, and enterprise in mobile application integration
- Prepare technology ROADMAP of the organization- Short Term (1-3 Years) and Long Term ( 5-10 Years)
- Proficiency levels for technical skills and applies skills to the design of architectural solutions.
- Record software architecture in a software architecture document using use cases and the Unified Modeling Language (UML).
- Knowledge of Material design is an added advantage.
- Exceptional verbal, write and listening skills.

### **Primary Roles & Responsibilities:-**

#### **Process:-**

- Able to communicate and document an understanding of client's CTO & Technical Architecture and other senior staff with confidence on technical matters.
- Responsible for On-Time delivery from Project Team with desired expected quality conformance of deliveries and releases with proper technical documentations such as SRS,URD, Test Reports, Used Cases and other mandatory reports.
- Ability to lead team as Technical Leader. Must be a good team player.
- To trouble shooting on all technical front to meet technologies.
- Able to audit code review of Senior & Junior Developers.
- Mentor development and support teams through leading by example using development standards and insights into design at a products and enterprise level.
- Anticipate and prevent issues and impediment before they occur.
- Drive repeatable, auditable and scalable processes.
- Defining the overall technical architecture for the web and mobile application that is envisioned with the customer technical team.
- Defining the technical requirements for the implementation of the MEAN Stack solution.

- Discussing technical aspects of the web mobile application solution architecture, including the technology used, the methodology followed, and devices selected by the customer.
- Deliver MEAN & mobile platform and architecture recommendations based on project requirements and industry best practices
- Take ownership of the technical solution from end to end, and be responsible for translating functional requirements into a desired solution .
- Maintain and evolve software architecture documents based on evolving system requirements and industry trends and technologies.
- Analyze risk assessment and report problems in meeting system requirements.
- Provide supporting information to the developers to aid in the creation of a system specification.
- Provide Technical guidance and resolve technical issues faced by Software Developers.
- Lead the review process for software Technical Architecture Documents (TAD).
- Participate in the system specification review process to ensure system requirements can be translated into valid software architecture
- Comply with all applicable product development processes. Perform detailed software design as well as implements and/or maintains code according to duties and responsibilities

#### **Quality:-**

- Hands on experience in testing environment with automated tool.
- Experience in developing reusable artifacts/frameworks, re-usable assets, Industry solutions, reference architecture, design, development and QA best practices.
- Prepare standard operating procedures (SOP) for Coding IOS/Android mobile application development.
- Evaluation of Quality of technical skills of existing and new resources.
- Periodical test for evaluation of Technical skills- (Every Quarter).
- Quality Parameter- Checklist compliance.

#### **Secondary Responsibilities:-**

- Certification in IT Architecture.
- Fundamental understanding of Big Data related technologies SPSS, R, Python, Hadoop etc
- Preferred Technical and Professional Expertise in either or all of tools like Python, R, SPSS and Machine learning .
